(54) ORGANIC ELECTROLUMINESCENCE ELEMENT AND ORGANIC LIGHT EMITTING MEDIUM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an organic EL element which is superior in heat resistance, has a long life, and in which a highly efficient light emission is obtained, and provide an organic light emitting medium that is appropriately used for this EL element.

SOLUTION: This is an organic electroluminescence element having a pair of electrodes and the organic light emitting medium layer that is pinched between these electrodes, wherein the organic light emitting medium layer is the organic electroluminescence element which contains (A) at least one kind of electron transporting compound and (B) anthracene derivative having a specific structure.

LEGAL STATUS

[Date of request for examination]

23.07.2003

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]
